

*To our wonderful children of Boddington*

*In most good stories, characters need to overcome challenges which leads them on an adventure, not always knowing where they will end up. One thing we always know, for sure, is there will be a happy ending. So, our adventure begins. This is going to be one of those times; for a while we are going on our own journeys, which will mean we will need to stay apart until things are better and it is safe to return to Boddington. We will have our happy ending and see you all return safely to school with our friends.*

*I know lots of you may be worried about a bug that is making people sick (COVID). Our wonderful doctors and nurses have worked really hard and have found some medicine which will stop people from getting sick. The people in charge of our country think they can look after us better, whilst they give older people this medicine, if we stay apart for a while and to keep safe.*

*Your teachers will be teaching and caring for you, in a different way for a while. They will be talking to you through video calls and sending you activities to keep your brain growing while you are not at school. Keep working hard, try your best and talk to the adults around you if you are worried. Your teachers will be checking in on your home learning by looking at the work your parents send them and I will be talking to teachers about how you are doing. I know you will all succeed in all that you are being asked to do and I look forward to seeing your home achievements.*

*The next few weeks are going to be hard for everybody, so listen to your parents and remember to be kind to each other, help with chores around the house and remember this will only be for a short while. Remember if you have worries, tell someone. Before you know it, we will be back at Boddington with our friends; learning, playing and having fun together*

*I know the adults at Boddington will miss you all very much. Sending you all best wishes and smiles to you and your families*

*Mrs Law.*

*Boddington Head of School*
